

Switch

Plugwise

The Switch is used to control one or several appliances, each connected to a Plugwise Circle. Specific appliances or groups of appliances can be assigned to the Switch via the Plugwise software in a very easy manner. Examples are the complete lighting at home or in the office. With just one 'click' all assigned lights can be switched on or off. The Switch can be easily attached to any flat surface at any location by means of the adhesive strip. Due to the wireless communication between the Switch, the Circles, and all other Plugwise products, the installation requires no cables.

Dimensions: 86.5 x 79.9 x 17 mm
Power supply: 2 x AAA 1.5V

ZigBee-MESH: 2.4 GHz

Be wise, plug in.
