

Circle+

Type E

Plugwise

Circle+ has the same functions as a Circle, but also serves as network coordinator. It registers what Circles are part of the network and communicates that to the Plugwise Source application. Circle+ is equipped with a clock that is used to synchronise timing with the other Circles. After the network has been installed, Circle+ can be used like any other Circle. All Plugwise networks contain one Circle+.

Dimensions: 81,3 x 72 x 43,5 mm
 Voltage: 100-240 V~
 Frequency: 50 / 60 Hz
 Max. current: 16 A

Connector: CEE 7/7 (E&F hybrid)
 Female connector: CEE 7/5
*For Belgian/French plug system
 with grounding pin*

Be wise, plug in.
